PROJECTS

Booksote Application
(MERN Stack)

- Objective: Developed a full-stack application to manage book listings, allowing users to view, add, and remove books from their collections.
- Role: Full-stack developer responsible for the front-end implementation using React and state management tools.
- Skills Utilized: Designed user interface with Bootstrap, integrated RESTful APIs for backend communication, managed state with React hooks, and applied responsive design techniques.
- Impact: Enhanced user experience by creating a smooth and interactive interface that resulted in positive feedback from users.

Education:

- Bachelor's in Information Technologies from Magadh University, Gaya Bihar, Graduated: 2024
- Relevant Coursework: Web Development, Software Engineering, Database Management
- Academic Projects: Developed various web applications as part of the curriculum.
